

A Paper With No References Heading

2 Method

We describe the method here. Readers who want the full derivation should consult the references listed at the end of this paper, and in particular the bibliography of [2], which is more complete.

The remainder of this section is filler so that the document has enough pages for the last-15% fallback to have something to bite on.

Section 2

Body text on page 2.

We describe the method here. Readers who want the full derivation should consult the references listed at the end of this paper, and in particular the bibliography of [2], which is more complete.

The remainder of this section is filler so that the document has enough pages for the last-15% fallback to have something to bite on.

Section 3

Body text on page 3.

We describe the method here. Readers who want the full derivation should consult the references listed at the end of this paper, and in particular the bibliography of [2], which is more complete.

The remainder of this section is filler so that the document has enough pages for the last-15% fallback to have something to bite on.

Section 4

Body text on page 4.

We describe the method here. Readers who want the full derivation should consult the references listed at the end of this paper, and in particular the bibliography of [2], which is more complete.

The remainder of this section is filler so that the document has enough pages for the last-15% fallback to have something to bite on.

Section 5

Body text on page 5.

We describe the method here. Readers who want the full derivation should consult the references listed at the end of this paper, and in particular the bibliography of [2], which is more complete.

The remainder of this section is filler so that the document has enough pages for the last-15% fallback to have something to bite on.

Section 6

Body text on page 6.

We describe the method here. Readers who want the full derivation should consult the references listed at the end of this paper, and in particular the bibliography of [2], which is more complete.

The remainder of this section is filler so that the document has enough pages for the last-15% fallback to have something to bite on.

Section 7

Body text on page 7.

We describe the method here. Readers who want the full derivation should consult the references listed at the end of this paper, and in particular the bibliography of [2], which is more complete.

The remainder of this section is filler so that the document has enough pages for the last-15% fallback to have something to bite on.
